Product overview

Aptem Apprentice is the market-leading, award-winning, end-to-end apprenticeship delivery platform, used by more than 130,000 learners daily. From recruiting and enrolling a learner, through to final EPA, Aptem supports the entire learner apprenticeship journey.

Four key reasons the largest training providers and over 50% of universities use Aptem:

- 1 Aptem is highly customisable, so training providers can deliver programmes in a way that retains their competitive advantage.
- 2 Aptem's strategic roadmap aligns with its customers. Examples include implementing AI features that genuinely improve productivity and efficiency for training providers.
- 3 Aptem supports customers to manage the compliant delivery of apprenticeships – streamlining the mundane but important tasks.
- 4 Aptem fulfils its SaaS promise to deliver a market-leading product with regular, reliable updates.

The impact of Aptem:

30%

time saving overall enabled coaches to focus on learner experience at a large training provider.

82%

reduction in time to onboard learners for one of the UK's largest training providers.

5 months to 1 day

for a university adding learners and employers to the apprenticeship delivery system.

1 month to seconds

for a university to submit their monthly ILR.

Aptem Apprentice: a customisable, end-to-end apprenticeship management system

Aptem Apprentice’s industry-leading functionality appeals to a variety of stakeholders, including apprentices, employers and auditors, all of whom have different needs and priorities.

In this context, it is clear that when it comes to the technology that sits at the heart of an ambitious training business, a ‘one size fits all’ approach will not deliver. Leading and growing providers often require processes and systems that will support high levels of personalisation and agility, while also meeting the latest compliance standards.

Features that cover your business-critical requirements

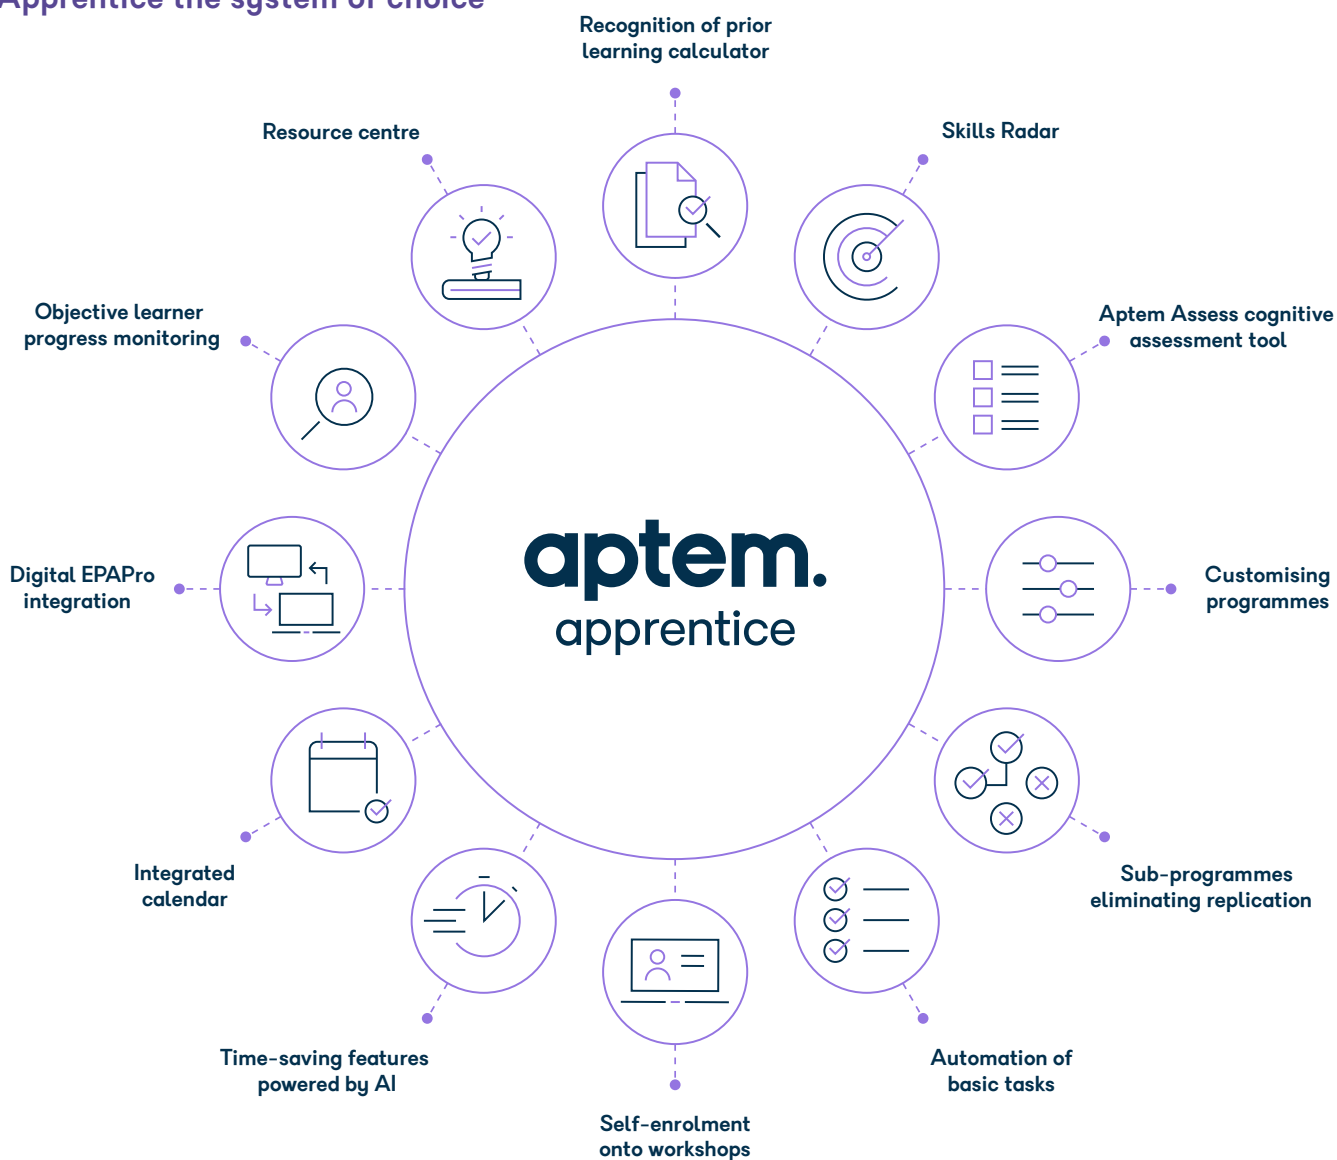

If tailored programmes get the best results, why are so many providers simply not taking this approach? For many without the supporting technology, it's deemed 'too cumbersome', and would require a huge amount of manual work to create multiple programmes which, in turn, would be incredibly hard to manage.

Aptem Apprentice enables you to customise while delivering at scale.

Features that make Aptem Apprentice the system of choice

With Aptem Apprenticeship, you can:

- ✔ Customise your programmes to your exact delivery model.
- ✔ Automate tasks to reduce admin time.
- ✔ Customise reviews to drive meaningful interactions, not box-ticking exercises, and see all metrics in one place.
- ✔ Effectively capture a learner's competency level and progression throughout their programme.
- ✔ Get those starting points right by using our popular, free Recognition of Prior Learning (RPL) calculator.
- ✔ Identify learners with additional needs, with built in cognitive assessment – Aptem Assess.
- ✔ Customise your learning experience through sub-programmes – eliminating the need to have multiple versions of a programme for the same apprenticeship.
- ✔ Increase engagement through built-in Communications Connector using Microsoft Teams.
- ✔ Deliver full eLearning using SCORM – upload your own engaging learning assets or create them directly in the platform, with evidence capture in an integrated LMS/VLE/ePortfolio.
- ✔ Prioritise efficiency and consistency through Aptem's open API. Standard integrations including BKSb, Skills Forward, Century, Learning Records Service and EPAPro. Customers have also integrated Aptem with third-party systems such as Salesforce, SITS, Banner, Quercus and customer websites.
- ✔ Create actionable insights and manage in one place, without the need for separate systems, using our embedded Power BI Dashboards.

Aptem's single-page dashboards provide an instant snapshot, with drilldowns, of key analytics including learner progress and achievement, caseload, compliance, Ofsted and financial performance.

● ● ●

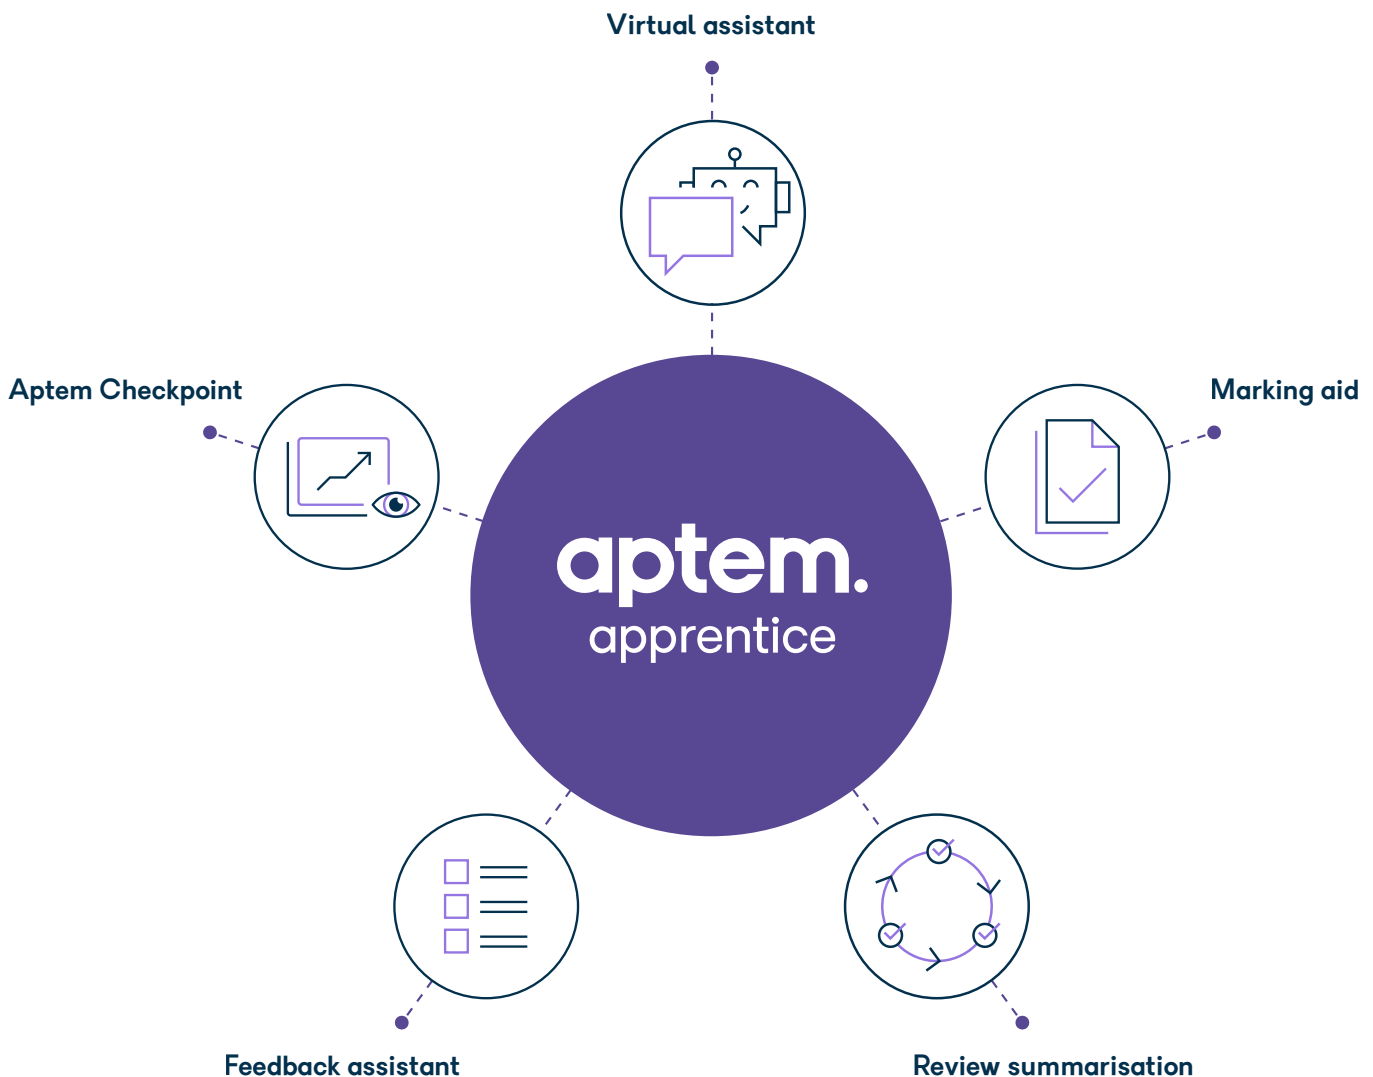

I cannot stress enough how impactful it's been pushing everything into Aptem and making it a one-stop shop, particularly for the learner.

Dom Wilkinson, Operations Partnership Manager, Lifetime

Aptem Enhance from Aptem Apprentice: Automating admin to elevate human impact

The timely emergence of new Large Language Models and AI technologies creates a step-change opportunity for apprenticeship providers.

By complementing valuable internal expertise with AI-powered tools within our platform, providers will be able to unlock new levels of efficiency. You'll be able to make time for more meaningful interactions with learners and consistently raise the quality of teaching for all. We're calling this transformative new feature set 'Aptem Enhance'.

Virtual assistant for learners: 24/7 access to information, capitalising on learning momentum by providing answers mapped to the apprenticeship standards, whenever, wherever, regardless of tutor availability.

Marking aid: reducing the time required to provide meaningful feedback on submissions.

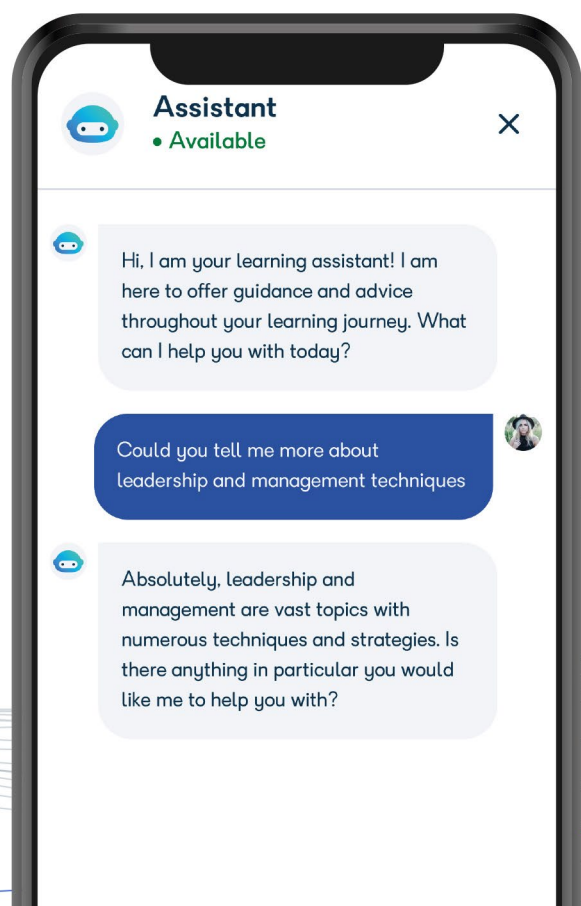

Feedback assistant: advancing learning outcomes by improving tailored, contextualised feedback.

Review summarisation: eliminating the trade-off between valuable discussion and accurate record-keeping by automatically documenting key discussion points, themes, feedback and action points as each review conversation progresses.

Checkpoint: monitoring learner progress and supporting learner development by presenting a series of questions to learners at relevant points in their apprenticeship.

Value multiplying features that work together

We're measuring the impact these tools are having on our customers and their learners.

Here's what you can expect if you are a training provider with 1,000 learners:

Checkpoint

33% improvement in planned end date accuracy resulting in annual funding gains of

£59,400

Marking aid

50% of your tutors' weekly marking time saved resulting in annual funding gains of

£130,680

Review summarisation

50% of your tutors' weekly time spent writing up reviews saved resulting in annual funding gains of

£253,440

Just three of the Aptem Enhance features will result in additional total funding of

£443,520

with no changes to the cost base.

* Calculations are based on accepted industry averages.

Use Aptem's Enhance impact calculator to see the savings you could make:

Calculate

The Aptem virtual assistant for learners is doing exactly what we'd hoped for. As an example, one of our learners asked it about a work scenario and whether this counted towards 'Off-the-Job' hours. The virtual assistant correctly confirmed it did not and gave the reasons. This is brilliant. It not only gave the learner an instant response but saved us a 5-minute phone conversation.

The Aptem team behind the partnership

We know that the team behind the technology really matters to you. When procuring a technology provider, we are rightly asked:

“How are you incorporating development into your product? What does your product development team look like? Can we be confident that the investment will last? What level of support will we receive to help your technology grow with our business?”

Adopting a new technology is a large-scale change project. You need a partner that will help you and your team to implement it, use it and reap the rewards. As an Aptem customer, you benefit from a team of 113 (and growing!), dedicated to ensuring your success using our system.

Product development

Your organisation is evolving. And we are evolving to support your changing needs, with a superbly resourced development team that keeps our technology roadmap moving forward. More than 50% of the Aptem team works in software/product development and our roadmap is published on our website.

The industry as a whole is constantly evolving. Layer that with curriculum demands, client requirements and growth ambitions; we need a system that is agile and a team behind it that can react quickly. We value the ethos and ambitions of the Aptem team. The way they have scaled and are improving the products aligns with our own ambitions.

Corndel

Implementation consultancy

Behind every successful technology is a watertight, customised implementation. Your dedicated Implementation Consultant will be with you every step of the way as your ‘critical friend’, advising and configuring the system to achieve your goals. Our Implementation Consultants have unrivalled sector and product knowledge.

The implementation process was supported by Aptem’s high-quality implementation consultants who guided us through the process quickly.

Learning Curve Group

Customer success management

Once the implementation period is complete, you will be in the hands of a Customer Success Manager. They will help you to get the most from the system and to measure the impact it has on your organisation's growth, learner outcomes, employer engagement and compliance.

Nothing but excellent service and support. We are building a platform that fits us, our sector and will hopefully deliver our learners a fabulous learning experience.

Ensis Solutions

Technical support

An extensive Help Centre, packed with easy-to-follow guides and tips, helps you to get the most from your Aptem system. Regular product webinars take customers through new and existing functionality. A UK-based support team is at the end of the phone to answer your organisation's questions and work through any challenges with you.

I love Aptem, and the customer service support is really helpful. Aptem gets better by the month. It's simple and easy to use. Thank you for your support.

Learner at Access Creative College

By the end of implementation you will have a high level of in-house capability, with competent superusers who know how to configure and use the system, and how to customise it to meet your future business needs.

Case study: Why Corndel renewed with Aptem

With a relentless focus on delivering exceptional-quality training programmes across Leadership and Digital, Corndel has grown into one of the largest vocational training providers in the UK.

The choice to renew with Aptem

Having reviewed several apprenticeship delivery systems, Corndel shortlisted and ultimately decided to renew with Aptem. “Aptem was the only system that could meet our goals. This includes the ability to build exciting content for the learning plan and upload it into Aptem using SCORM. The new user interface in Console is “smart and intuitive”, receiving positive feedback from learners and employers. We also use Aptem to help deliver a higher degree apprenticeship offering. Aptem has extensive knowledge in this marketplace and is the only viable provider. In addition, we use Aptem to continue to manage the delivery of commercial programmes.”

Richard Bridge, Director of Learning Technology

Selecting the right technology platform for future growth

At renewal, the team at Corndel challenged themselves to ensure that Aptem was still the best-available product to service their business. “Historically we have very close ties with Aptem. Aptem is a valued partner. But the renewal presented us with an opportunity to review our technology to ensure Aptem remained the appropriate choice for the next stage of our business. We have ambitious plans to continue our growth trajectory and bring exceptional training programmes to the market, so we needed to ensure that the technology platform could continue to meet these ambitions,” said Richard Bridge, Director of Learning Technology at Corndel.

After a full market analysis of all apprenticeship delivery systems, Corndel decided that end-to-end systems took priority:

Delighting our learners and employers lies at the heart of what we do. It’s not a great experience for either party to have to log on to myriad systems, especially in the first few weeks when onboarding onto a learning programme.

Richard Bridge, Director of Learning Technology

Corndel's criteria for selection

Working at scale

Corndel onboards high volumes of learners each month. Their system needs to automate basic administration processes, and create accounts for learners in bulk. Streamlining the onboarding process is also crucial to Corndel's promise to deliver an exceptional learner experience. Senior leaders at Corndel have confidence in the security of the platform, with servers held in the UK and a single tenant set-up per customer.

Working at pace

Corndel is constantly evolving and improving its programmes, upgrading content based on customer feedback, creating personalised modules so that the organisations it works with can meet their specific L&D objectives, and adapting to ensure compliance. The chosen system has to be able to support these requirements.

Customisation

Corndel's roots lie in industry disruption. They had a simple goal when they conceived Corndel back in 2016: to deliver brilliant training. In order to deliver brilliant training that delights their learners and employers, they created a different kind of delivery model. Irrespective of their size, they still challenge themselves daily to ensure they optimise this model. Crucial to that is a system that doesn't constrain them.

Development roadmap

It's crucial that the future roadmap and general direction of travel is in sync with Corndel's requirements. They value features like the ability to isolate and change part-time learners or breaks-in-learning learners on non-standard chronology. The Corndel team values the system's ability to help ensure compliance, because the platform has been deliberately built to service apprenticeships.

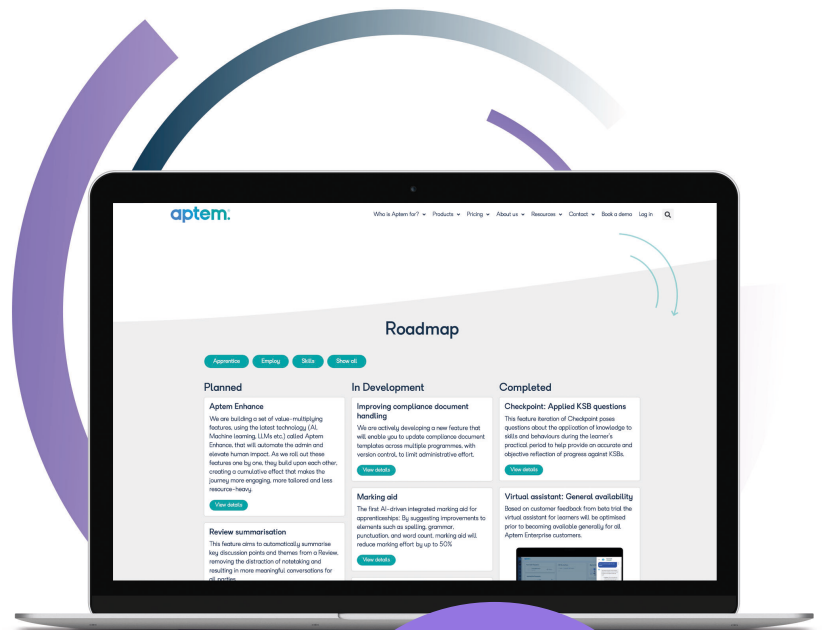

Roadmap: Aptem as a partner for the future

One of the key reasons large providers choose Aptem is a proven track record in continuous product feature development and enhancement.

Through our customer forums, including the Higher Education Forum and the Enterprise Forum, we proactively seek to understand your current and evolving processes and challenges. In the longer term, we are interested to know what's on the horizon for your business, which areas are you likely to be focusing on in three to five years, what far-off growth plans might we want to be considering now from a technology perspective?

Published product roadmaps

Our published product roadmaps show the direction in which we are heading and the types of outcomes we are aiming for. They focus on the outcomes we want to deliver for our customers and users, grouping them into themes or initiatives. The roadmaps evolve as we learn more and allow us to open up a practical dialogue with our customers about the problems they would like us to solve.

In Aptem we have found a partner that has a flexible system to meet the specific demands of high-quality degree apprenticeships and can evolve in line with our future needs and aspirations.
